SUMMARY

Strategy, transformation, and operations leader with 12+ years turning ambiguous, cross-functional problems into structured plans, operating cadence, and measurable outcomes across SaaS, media, healthcare, biotech, and financial services. Partnered with the C-suite through Kaseya's \$350M to \$1.75B SaaS scale and 14 acquisitions, owning the planning rhythm, KPI infrastructure, scenario modeling, and board-level reporting that turned leadership's priorities into trackable execution across a \$1B+ organization.

Owns the space between strategy and execution: shapes enterprise strategy and organizational design with commercial judgment and quantitative rigor, then drives delivery across teams that sit outside any reporting line by owning the cadence, the dependencies, and the data behind every call. Reporting stays hands-on in SQL, Tableau, and Looker-class dashboards, and a 60+ agent AI operating system built solo on Claude turns raw status into decision-ready narratives, accelerated with ChatGPT, Copilot, and Gemini.

KEY ACHIEVEMENTS

Strategic Scaling & Operating Cadence

Built the planning cadence, KPI infrastructure, and operating discipline that let a \$1B+ SaaS organization scale from \$350M to \$1.75B through 14 acquisitions, keeping fast-moving teams pointed at the same targets.

Transformation & P&L Impact

Ran 5 transformation initiatives across Procurement, Legal, HR, and Operations at a gene-therapy company for \$1M+ in annualized savings, and built the cost, scenario, and capital-allocation models behind major investment and acquisition decisions across \$1B+ in revenue.

Cross-Functional Delivery, End to End

Led the AMC+ subscription launch across Product, Engineering, QA, and Marketing and pulled a fragmented 32-channel portfolio onto one plan across 16 business units and 12 partners, cutting execution cycle time ~30% and contributing to 65% digital revenue growth.

AI Operating System, Built Solo

Designed and built a 60+ agent AI operating system on Claude spanning 12 departments and a 14-stage adversarial QC pipeline, defining the roles, routing, and governance so it produces decision-ready output, with a human on every decision that leaves the system.

EXPERIENCE

Founder & Architect, Executive Office (AI Operating System)

2025 – Present · Independent

Self-Directed

Designed and built, solo, a production multi-specialist AI operating system on Claude, now public and documented on GitHub. Demonstrates applied-AI and AI-transformation capability translating real strategy and operations work into agentic workflows.

- Architected a 60+ specialist AI operating system spanning 12 departments, defining the roles, routing, governance, and prompting so the system produces decision-ready output rather than raw drafts.
- Built a 14-stage adversarial QC pipeline that pressure-tests every artifact for truthfulness, quality, and voice, with a human on every decision that leaves the system.
- Stood up AI-assisted reporting and program workflows with Claude, ChatGPT, and Copilot that turn raw status into executive-ready narratives, applying the same operating cadence and data discipline that ran a \$1B+ organization.

Director, Strategy & Client Delivery

2020 – 2026 · Remote

SOL Consulting

Owned the multi-year AMC Networks account end to end, progressing across engagement cycles from Account Manager to Senior Technical Project Manager to Senior Program Manager and running the integrated program plan, operating cadence, and cross-functional delivery across the FAST & AVOD organization at AMC Networks.

Senior Program Manager, FAST / AVOD Marketing (AMC Networks)

- Built the operating cadence and integrated program plan that kept 16 business units and 12 external partners moving as one across Product, Marketing, Distribution, Technology, and Operations, aligning teams that did not report to him and cutting execution cycle time ~30%.
- Stood up governance and KPI tracking across 32 digital channels, giving leadership one source of truth for status, risks, owners, and decisions instead of chasing updates across a fragmented portfolio.
- Read the cross-functional data and set sequencing across the portfolio so teams worked the highest-impact problems first, and prepared the executive briefings and QBR materials behind each call.
- Wrote the reporting and analysis hands-on in SQL and Tableau, then accelerated it with ChatGPT and Microsoft Copilot, turning raw status into decision-ready leadership updates and cutting hours of manual reporting each week.

Senior Technical Project Manager, Digital Transformation (AMC Networks)

- Led the AMC+ subscription launch end to end across Product, Engineering, QA, and Marketing with clear objectives, timelines, and success metrics, sequencing every team from priority through ship and contributing to 65% digital revenue growth.

- Built the AMC+ identity feature for launch and drove ongoing website enhancements, folding product roadmap, engineering delivery, and go-to-market into one trackable plan with every dependency in plain view.
- Caught bottlenecks, scalability constraints, and dependency conflicts before they reached the critical path, then drove each to resolution with leadership to keep the path clear ahead of ship.
- Ran retrospectives and post-launch reviews, turning incident learnings into repeatable process and automation that made each subsequent release steadier and replacing fragmented stand-ups with a single weekly executive read.

Account Manager (AMC Networks)

- Served as the operating liaison between SOL Consulting leadership and AMC Networks executives, aligning enterprise priorities and execution across a multi-year engagement.
- Grew the AMC Networks engagement from \$280K to \$2.1M annually by reading where priorities were headed, shaping scope to match, and sustaining executive trust cycle after cycle.
- Set the operating cadence and accountability rhythm for a team of 8 consultants, holding delivery to client expectations and developing the team across the engagement.
- Brokered escalations between client executives and delivery leadership, turning friction into agreed paths forward and protecting account health through each renewal.

Senior Manager, Strategic Finance & Business Operations

2018 – 2020 · New York, NY

Kaseya

Operating partner to the C-suite through Kaseya's growth from \$350M to \$1.75B across 14 acquisitions, owning the planning cadence, KPI infrastructure, scenario modeling, and the capital-allocation analysis behind investment and integration decisions that kept a \$1B+ SaaS organization moving in one direction.

- Acted as operating-spine partner to the C-suite and Executive Leadership Team through the \$350M to \$1.75B scale, running the planning cadence and cross-functional alignment that let a \$1B+ SaaS organization scale with discipline.
- Built the cost and scenario models behind investment, acquisition, and integration decisions across \$1B+ in revenue, giving leadership the data they used to allocate resources against strategic targets.
- Prepared board-level reporting for QBRs and Steering Committee meetings, turning performance, risks, and recommendations into the narrative leadership used to set portfolio priorities.
- Built KPI dashboards and tracking frameworks that gave leadership real-time visibility across business units, replacing manual status-chasing with a single source of truth in executive reviews.
- Modeled scenarios and capacity plans across 14 acquisitions so leadership could pressure-test integration tradeoffs before committing capital, and stood up the KPI and reporting infrastructure in Tableau and SQL that made each deal trackable post-close.

Consulting Manager

2017 – 2018 · New York, NY

AArete

Partnered with executive stakeholders at bluebird bio, a gene-therapy company, to lead operational transformation and cost optimization across the enterprise, turning cross-functional process reviews into measurable financial outcomes.

Team Lead (bluebird bio)

- Directed 5 transformation initiatives across Procurement, Legal, HR, and Operations at bluebird bio, delivering \$1M+ in annualized savings while preserving SLA quality for the executive sponsor.
- Led cross-functional contract reviews with Finance, Legal, HR, and Operations, negotiating improved vendor terms and consolidating spend on behalf of executive stakeholders.
- Built the tracking framework for initiative progress, financial impact, and risks, giving executives one portfolio view.
- Synthesized weekly initiative progress into executive narratives for bluebird leadership, sharpening the C-suite's view of savings risk and tradeoffs.
- Set the operating cadence across the engagement, running the steering reviews and status reporting that kept the executive sponsor aligned on progress, risks, and the next decisions across all five initiatives.

Senior Consultant / Consultant

2014 – 2017 · New York, NY

Optimity Advisors

Delivered enterprise transformation programs across Financial Services, Media & Entertainment, and Healthcare, focused on execution, governance, and the operational infrastructure clients needed to sustain improvement, progressing from Consultant to Senior Consultant.

Technical Business Analyst (Moody's)

- Served as technical business analyst on a next-generation internal credit-rating platform, translating business needs into functional specifications and feeding development priorities back to leadership.
- Drove process optimization and performance tracking across the SDLC, contributing to 20% efficiency gains for the program.
- Coordinated business and engineering teams against the delivery roadmap, surfacing requirements gaps and dependency risks early so the platform stayed on plan.

Project Manager (CareFirst BlueCross BlueShield)

- Managed delivery and compliance readiness for a small-business health-insurance product within a 7-project program, coordinating cross-functional teams against strict regulatory timelines.
- Tracked progress, risks, and dependencies into executive-ready status, keeping business and operational stakeholders aligned through launch.
- Coordinated business, technical, and compliance stakeholders across the program, keeping interdependent workstreams sequenced and on schedule through launch.

Systems Analyst Intern
Maximus

Summer 2013 · Reston, VA

Supported enterprise technology delivery by bridging business and technical teams within government technology programs.

- Translated business and operational requirements into technical specifications for development teams supporting NY State enterprise software delivery.
- Bridged business and technical teams on a government technology program, supporting requirements gathering and delivery coordination across the engagement.
